BLACK SYSTEMS

Book a call, share your process, and your first automation goes live within weeks.

AI automation for growing businesses - instant lead response, less manual work.

Márton Csizmazia marton@blacksystems.ai +36 30 316 5634 blacksystems.ai

About

The AI automation partner for growing businesses. AI systems that bring in more leads and take the repetitive work off your team.

(Pre)

Leads slip through the cracks, replies take hours, and your team loses days to copy-pasting, data entry and chasing follow-ups.

(+Post)

I build AI systems that answer every lead within minutes and qualify them, while the data entry, copy-pasting and admin run on their own in the background, reliably, day and night.

(=Results)

under 1 minute	100%	up to 90% less	up to 10 hrs/week
Lead response time	Leads followed up	Manual data entry	Time back per person

How it works

01

Free call

30 minutes, free and with no obligation. You show me how your business runs, and I find where time and leads get lost.

02

Written proposal

You get the scope, the price and the timeline in writing. No work starts without your approval.

03

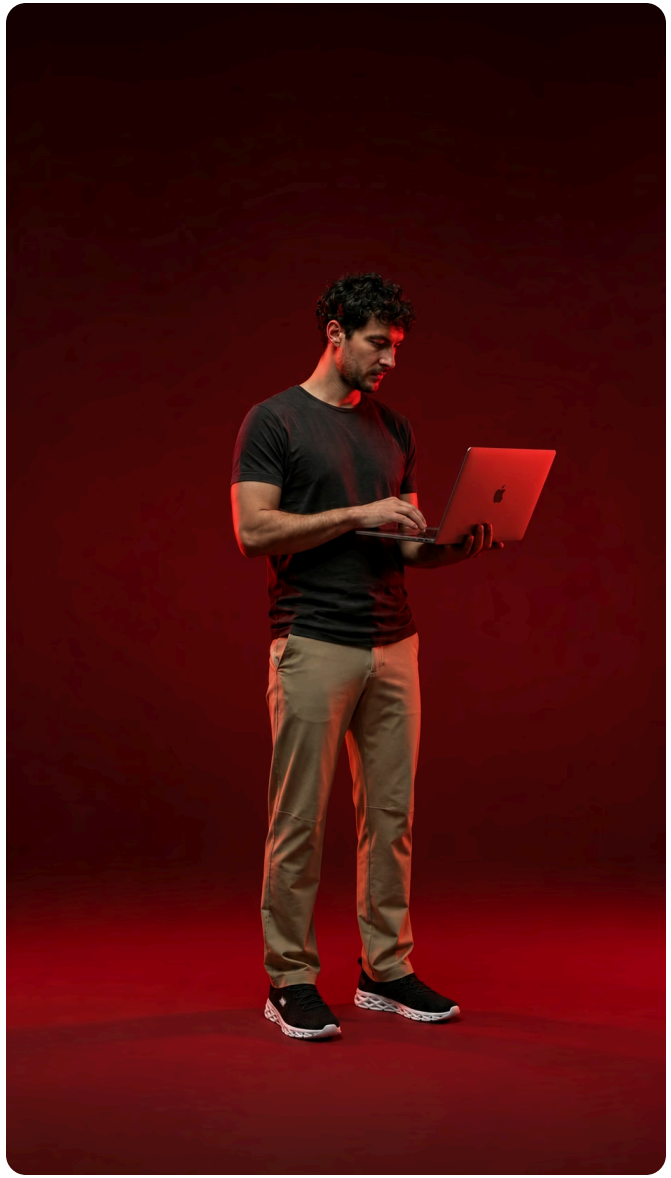

Build & launch

I build and test the automation with your own tools and real data. Your first one goes live within weeks.

04

After launch

You're never left on your own after launch. I keep an eye on every automation, fix whatever needs fixing and build on it as your business grows.

(You'll work with)

Márton Csizmazia

Founder & CEO

I'm Márton, the founder of Black Systems. I work with every client directly, from mapping how your business runs to launching the system and keeping it running, so you always know what's being built and why.

Before Black Systems, I spent seven years in software development, most of them in corporate banking, where systems have to be secure, precise and never fail. I bring that same standard to every automation I build.

(Where I built systems before Black Systems)

Deutsche Telekom · voormedia · CLARIO · accenture

Services

Lead Capture & Response

Instant follow-up

Every inquiry from your website, forms, email or ads gets an answer within minutes, day or night. The system qualifies the lead, answers common questions and books the call straight into your calendar.

Manual Work Automation

Hands-off operations

Copy-pasting, data entry, CRM updates, follow-up emails and reports run automatically between your tools, so your team spends its time on clients, not admin.

Audit & Custom Systems

Built around your process

I map how your business actually runs, find where time and leads are lost, and build tailored automations for everything in between, tested, integrated and supported after launch.
